Many books have investigated whether Newton believed that an original pure knowledge existed. Some conclude that he did in fact search for it, but that is the whole of their investigation. A few have written that Newton actually discovered "something" and try to fit his existing research into a prisca sapientia of their own design, claiming his beliefs fit modern realms of philosophy or eastern religions, but these speculations are not upheld by the body of his work. Although Newton had solved riddles of space, time, gravity, light and invented mathematics to predict the motion of objects, this was not the "priscia sapientia". Since the time of Newton, no one has revealed the true form and nature of the original knowledge, or from whence it came - until now. For the first time in history, "Temple at the Center of Time" uncovers what Newton was looking for and, in so doing, proves that pivotal events in history are unquestionably connected in time and space to Jerusalem.
